<b>*Acid League</b> , Proxies, 'Red Amber' (NA) <i>Ontario, Canada</i>	14
<b>**Unified Ferments</b> , Snow Chrysanthemum (NA) <i>Brooklyn, NY, USA</i>	15

\*Proxies are a whole new form of beverage - layered blends of juices, teas, spices, bitters, and more - that boast the complexity of wine with none of the alcohol. Devin Campbell, a former winemaker, helps to craft every bottling, and each ingredient is unlocked to extract the best flavor before blending into one cohesive, complex drink.

\*\* Unified Ferments lives at the intersection of two culinary wisdom traditions: tea production and fermentation, both of which have a prehistoric lineage. By starting with and further manipulating the base practices of kombucha-making, founders Young Stowe and Graham Pirtle unpack and translate the world of fine and impactful single-origin black and herbal teas, yielding uplifting effervescence and an elegance worthy of stemware.
